Symposium Sessions and Invited speakers

SYMPOSIUM SESSIONS

- **Nanotechnology and advanced drug delivery**
- **Pharmaceutical engineering**
- **Quality-by-Design and Process Analytical Technology**
- **Pharmaceutical analysis and bioanalysis**
- **Drug development and personalized medicines**
- **Molecular drug targets and advanced therapy**
- **CEEPUS CEKA PharmTech and student session**

INVITED SPEAKERS

Prof. Seyed Moein Moghimi, Newcastle University, UK

Prof. Stefaan De Smedt, Ghent University, Belgium

Prof. Gert Storm, Utrecht University, The Netherlands

Prof. Maria J. Alonso, University of Santiago de Compostela, Spain

Prof. Andreas Zimmer, University of Graz, Austria

Prof. Aleksandar Dimovski, Ss. Cyril and Methodius University in Skopje, N. Macedonia

Symposium Topics

- Pharmaceutical manufacturing and engineering
- Pharmaceutical excipients
- Polymers in pharmaceutical engineering
- Green and sustainable pharmaceutical technology
- Nanomaterials, nanotechnologies and nanomedicines
- Generic and innovative drug product development
- Biopharmaceutical aspects in drug development
- In vitro/in vivo/in silico modeling
- Pharmaceutical analysis and bioanalysis
- Drug counterfeiting
- Regulatory affairs
- Patient centered drug delivery
- Personalized medicines development
- Additive manufacturing
- Biopharmaceuticals and biosimilars
- Pharmaceutical biotechnology
- Cosmetology
- Development of nutraceutical products
- Veterinary medicines technology
- Radiopharmaceuticals

Start planning for CESPT 2023!

Aim and Scope

The 14th CESPT in 2023 will offer a platform to discuss new ideas in formulation design, drug delivery research, as well as share ideas about technological advances for high-quality drug production. The current and future aspects of pharmaceutical development, innovative product technologies, manufacturing processes, pharmaceutical quality and regulatory challenges will be addressed by scientists and engineers from academia, industry, regulatory bodies and students. Also, the symposium aims to tackle, from a multi-disciplinary perspective, the challenges and future outlook of the rapidly developing class of chemically engineered pharmaceutical products so called nanopaharmaceuticals and their application in biomedical field. Presentations from multidisciplinary researches and international expert speakers as well as fruitful discussions on the topics of the symposium will take us beyond the limits of current knowledge in the development and manufacture of safe, reliable and effective medicines. Besides sharing knowledge and experience we believe that future collaborations and research projects will be born on site during both, the working sessions of the meeting and the social events.

The submitted two-page symposium abstracts will go through peer-review process and the *accepted works will be published in a proceedings e-book within a special issue of the Macedonian Pharmaceutical Bulletin* supported by an international scientific committee. At the later stage, full papers' version of the selected contributions could be published in a special issue of a high-ranked journal.

On behalf of the President of the Symposium, we are glad to invite you to the CESPT 2023 in the city of Ohrid, N. Macedonia.

About Ohrid

Ohrid is the largest city on Lake Ohrid and the eighth largest city in the country. Ohrid is famous for having 365 churches, one for each day of the year, which is why it is known as the “Balkan Jerusalem”. The city is rich in picturesque houses and monuments. In 1979 and 1980, Ohrid and Lake Ohrid were recognized as a UNESCO World Heritage Site. In fact, Ohrid is one of only 28 cities that are part of the UNESCO World Heritage Site and are both cultural and natural heritage. Ohrid is one of the leading tourist cities in North Macedonia. Ohrid Lake is one of Europe's deepest and oldest lakes, with a unique aquatic ecosystem of worldwide importance, with more than 200 endemic species. **We look forward to welcoming you in Ohrid and enjoy its beauties together!**
